

# Budgie Alpha Tests

# Scenario 1

You have downloaded Budgie and want to try it, so you decide to create an account.

# Scenario 2

You want to go shopping at your local grocery store, but don't want to spend more than \$100. You'd like to use Budgie to help keep track.  
Try to use the app to save that amount as your new budget.

# Scenario 3

Now you're at the store and you found an apple for \$1.25. Go ahead and create an item and populate it with the info on the apple.

# Scenario 4

You have been browsing the store and find that salted butter is on sale for \$4.49 and you could always use butter in the fridge at home. You use the label scanner to scan the label for the butter to add it to the budget.
